¹ The number of appeals from the judge's orders or judgments across the three-year period. Appeals are defined on the basis of a unique COA docket number. A single COA opinion can dispose of multiple appeals (e.g., where cross appeals were filed, consolidated appeals).

² The percentage of appeals in which the judgment or order was affirmed or in which the appeal was dismissed.

³ Based on the percent reported in table. Ties got the same ranking. Percents are reported for 91 judges for FY 2010, 2011, 2012 and for 93 judges for FY 2011, 2012, 2013.

⁴ Information on percent is omitted if the data from available COA opinions and orders showed fewer than 10 appeals over the three-year period. Thirty-eight judges are not listed in this table because they had fewer than 10 appeals in each of the two periods.
