¹ The number of appeals from the judge's orders or judgments across the three-year period. Appeals are defined on the basis of a unique COA docket number. A single COA opinion can dispose of multiple appeals (e.g., where cross appeals were filed, consolidated appeals).

² The percentage of appeals in which the judgment or order was affirmed or in which the appeal was dismissed.

³ Based on the percent reported in table. Ties got the same ranking. Percents are reported for 93 judges for FY 2011, 2012, 2013 and for a different set of 93 judges for FY 2012, 2013, 2014. Ranks ranged from 1 (high) to 78 (low) for FY 2011, 2012, 2013 and from 1 (high) to 75 (low) for FY 2012, 2013, 2014.

⁴ Information on percent is omitted if the data from available Court of Appeals opinions and orders showed fewer than 10 appeals over the three-year period. Several judges are not listed in this table because they had fewer than 10 appeals in each of the two periods.
