¹ The number of appeals from the judge's orders or judgments across the three-year period. Appeals are defined on the basis of a unique Court of Appeals docket number. A single Court of Appeals opinion can dispose of multiple appeals (*e.g.*, cross appeals, consolidated appeals, amended appeals).

² The percent of appeals in which the judgment or order was affirmed or in which the appeal was dismissed.

³ Based on the percent reported in table. Ties got the same ranking. Percents are reported for 93 judges for FY 2012, 2013, 2014 and for 92 judges for FY 2013, 2014, 2015. Ranks ranged from 1 (high) to 75 (low) for FY 2012, 2013, 2014 and from 1 (high) to 72 (low) for FY 2013, 2014, 2015.

⁴ Information on percent is omitted if the data from available Court of Appeals opinions and orders showed fewer than 10 appeals over the three-year period. Several judges are not listed in this table because they had fewer than 10 appeals in each of the two periods.
